I am a final semester Informatics Engineering student at Universitas Kuningan with a strong passion for technology, particularly in Web Development. I have successfully completed 17 projects across various platforms, including desktop and web, utilizing technologies such as PHP, Laravel, MySQL, Node.js, and Google Cloud. I am dedicated to developing innovative and scalable web applications, with one of my notable projects enhancing client workflow efficiency by 70%. My goal is to further hone my programming skills and contribute to the creation of cutting-edge technological solutions within a dynamic team environment.
