I am a Fullstack Developer with experience in application development and technology solutions across various projects. In my previous company, I successfully developed several features and 50 ILP screening forms, as well as optimized the database structure to support operational efficiency. Additionally, I have experience integrating technologies such as Sequelize and Next.js, contributing up to 20% to a more user-friendly UI/UX design. At Bangkit Academy, I led the Capstone project with a focus on cloud computing and the implementation of Machine Learning models on the Google Cloud Platform, enabling scalable and innovative solutions. With expertise in various technologies such as PHP, Node.js, MySQL, and Google Cloud, I am ready to make a significant contribution to the development and implementation of effective technology solutions.

Experience

PT. GLOBAL EDUTIPA INFORMATIKA - Kuningan, West Java, Indonesia   Dec 2024 - Present

Full Stack Developer

- Maintenance & Development of Esimkes Puskesmas
- Analysis of ILP Screening System
