Cirebon, West Java, Indonesia

Backend Developer with hands-on experience in designing and developing RESTful APIs, backend architectures, third-party integrations, and CI/CD pipelines using GitHub Actions. Skilled in Laravel, Node.js, MySQL, MongoDB, Linux, Nginx, VPS deployment, and Google Cloud Platform (GCP). Proven ability to lead application development projects, collaborate effectively with cross-functional teams, and deliver secure, scalable, and maintainable backend systems.

Pengalaman

PT. GAJAH NUSANTARA RAYA - Jakarta Selatan, Indonesia

Oct 2025 - Jul 2026

Backend Developer

- Led the development of 6 application projects by coordinating Mobile, Frontend, and Backend Developers to ensure projects were delivered on schedule, met business requirements, and adhered to quality standards.
- Developed and maintained RESTful APIs across six projects by following backend development best practices to ensure performance, reliability, and maintainability.
- Designed and implemented secure, scalable, and maintainable backend architectures aligned with business and technical requirements.
- Created and maintained API documentation using Postman, enabling seamless integration and improving collaboration between frontend, mobile, and third-party development teams.
- Built and managed CI/CD pipelines using GitHub Actions to automate the build, testing, and deployment processes, improving development efficiency.
- Deployed applications to Linux-based VPS environments and ensured stable, reliable performance in production.
- Configured and optimized Nginx as a web server and reverse proxy to enhance application performance, security, and availability.
- Collaborated with third-party service providers to integrate APIs, payment gateways, authentication services, and other external systems based on project requirements.
- Worked closely with cross-functional teams to gather requirements, troubleshoot technical issues, and ensure successful feature implementation.

**Direktorat Jenderal Pendidikan Tinggi, Riset dan Teknologi
Kemdikbudristek - Central Jakarta, Indonesia**

Feb 2024 - Jul 2024

Blockchain Web3 Developer Intern

- Designed Entity Relationship Diagrams (ERDs) to support scalable blockchain system architecture and cross-module data integration.
- Collaborated with the UI/UX team to improve interface consistency and deliver a better user experience.
- Developed and maintained RESTful APIs for blockchain modules, enabling secure and efficient communication between services.
- Authored and maintained comprehensive API documentation using industry best practices, simplifying frontend integration and reducing onboarding time for new developers.
- Worked closely with Frontend Developers to integrate APIs, troubleshoot integration issues, and ensure reliable data synchronization.

**Bangkit Academy led by Google, Tokopedia, Gojek, &
Traveloka - Indonesia**

Aug 2023 - Jan 2024

Cloud Computing Cohort

- Completed the Google Cloud Engineer Learning Path through Coursera and Dicoding as part of the Bangkit Academy program.
- Led the design and development of a cloud-native Capstone project by collaborating with multidisciplinary team members and integrating Machine Learning services on Google Cloud Platform (GCP).
- Designed the application's UI/UX following User-Centered Design (UCD) principles to improve usability and user experience.
- Developed and maintained RESTful APIs to facilitate secure communication between the mobile application and backend services.
- Designed and implemented a scalable architecture on Google Cloud Platform (GCP), ensuring high availability, reliability, and maintainability.
- Integrated Machine Learning models into the backend to process user data in real time and deliver accurate prediction results.

Pendidikan

**Universitas Kuningan - Jl. Pramuka No.67, Purwawinangun, Kec. Kuningan,
Kuningan Regency, West Java 45512**

Sep 2021 - May 2025

Bachelor of Informatics Engineering, 3.73/4.00

Lainnya

- **Programming Languages:** PHP, JavaScript

- **Backend:** Laravel, CodeIgniter, Node.js, RESTful API Development
- **Frontend:** Bootstrap, Tailwind, Next.js
- **Database:** MySQL, MongoDB
- **DevOps & Cloud:** Git, GitHub Actions, Linux, Nginx, VPS Deployment, Google Cloud Platform (GCP)
- **Tools:** Postman, Git, Visual Studio Code
- **Portfolio:** <https://aliabdurohman16.github.io/>
